Verifying Prescriptions in Discharge Rx on CMM EPMA

When orders are added to the Discharge Rx they will need to be clinically checked/verified.

Step 1: A notification will be received in the relevant pharmacy teams chat when a Discharge Rx has been completed. Review the information provided and open the patient in CMM Live.

Click on the [Order Modify](#) tab and change the order type.

It is also possible to amend the number of days to supply and if you want the GP to continue the supply.

Note: It is also possible to discontinue the order from here. This will only remove it from the Discharge Rx.

Once modified select the following reason '[Required for Discharge Rx](#)' for modifying the order and **click Confirm**.

Once all prescriptions have been reviewed and **Order notes** added **click X** on the **RX COMPARISON** screen to return to the **Discharge Rx** tab.

Step 7: If the **Discharge Rx** is missing prescriptions from the **Inpatient Rx** **click ADD DRUG FROM INPATIENT**.

Select the tick box **Add to Discharge** to add the prescription to the **Discharge Rx**, enter the number of days to supply if not automatically entered.

Note: Medications are set with a default regarding whether the GP should continue the supply. This can be amended if required by clicking on the tick box.

If there are any **Drug Conflicts**, a **Rationale** will need to be selected to continue. Once selected **click Save**.

Step 8: If an order needs to be removed from the **Discharge Rx**, **Select** the order line to open the **Order information**.

Note: When discontinuing the order from here, it will only be removed from the Discharge Rx.

Step 9: Once the **Discharge Rx** has been reviewed and the orders have been clinically checked they must be verified.

Orders can be verified in the same way they are on the **Inpatient Rx** by;

- a. Quick verifying - by hovering over the verification symbol and selecting the relevant verification status.

The screenshot shows the patient profile for Peter PAN, born 18-Jun-2002, at 6 Lodge House Neverland PE33 5TT. The 'Discharge Rx' tab is active. A list of prescriptions is shown, with the first one, 'Aripiprazole 5mg tablets', highlighted. A red box around the 'Verify' button shows a dropdown menu with options: 'Verify', 'Under Review', and 'Not Verified'.

- b. Updating the verification status under the verification tab when you click on an order line.

This screenshot shows the 'Verification' tab for the 'Aripiprazole 5mg tablets' order. The 'Status' section has three radio buttons: 'Verified', 'Not Verified' (which is selected), and 'Under Review'. A red box highlights the 'Verification' tab, and another red box highlights the 'Not Verified' radio button. A red arrow points from the 'Not Verified' option in the dropdown menu to the 'Not Verified' radio button. At the bottom right, there are 'Cancel' and 'Confirm' buttons, with 'Confirm' highlighted in a red box.

- c. Verify by **clicking BULK CHANGE** and selecting all the orders you wish to verify and **selecting Change Verification**.
